Install Easy Stick Roll Up Wall Mats

Easy Stick Wall Mats are an ideal product for grappling areas. The mat is a hybrid between AK Athletics Roll-Ups and Easy Stick pads; made with the same foam and vinyl as our grappling floor mats and the velcro from our wall padding. On the back of the mat, there is factory attached 12' velcro strips along the top and bottom, and the customer receives adhesive velcro for wall attachment. AK Athletics adhesive velcro applies best to a flat, smooth, clean wall.

What you need:

- Clean wall
- Wall level
- Pencil

Step One: Determine how high you want the safety wall mat to be hung; known as the baseline. Typically customers will have their mat touching the grappling mat or floor. Using a pencil and level create a 12' baseline.

Step Two: Peel off the plastic on the hard velcro, carefully attach the top of the velcro onto the baseline. It is essential for the velcro to have a smooth, full connection onto the wall. Wait 24 hours.

Step Three: Carefully attach the wall mat velcro to the wall velcro. Firmly press the mat to reinforce the velcro connection. Slowly roll out the mat and repeat step three.
