Measure Fence Padding

AK Athletics manufactures fence padding from 4' – 6' tall. Each panel in the fence pad is 2' wide. If you have an odd number of feet, call into our sales department to tailor the padding to fit your needs.

Install Fence Padding

We recommend sections no longer than 6 panels; 12'. Anything larger is too difficult to handle and install. Each panel has 3 grommet eye holes on the top and bottom. The pads are designed to be installed onto a chain link fence, using a zip tie to attach the panel to the fence. Don't forget to tie down the bottom portion of the pad to prevent the wind from blowing the pad upward.
